THIS DAY IN AVIATION

1912

10 August 1912

On 10 August 1912, Frank McLean piloted his modified Short S.33 float plane up the River Thames, creating a record by passing between the upper and lower parts of Tower Bridge and under London Bridge without touching the water. Starting at 6 a.m. from Harty Ferry, he navigated factory smoke at Gravesend and reached Westminster by 8:30 a.m., where a Port of London Launch took him ashore.

McLean's Short S.33 was a two-place, single-engine four-bay biplane with a pusher configuration and forward elevator. Powered by a 70-horsepower Gnome Gamma rotary engine, the aircraft featured a 70-foot, 6-inch upper wingspan and weighed 1,600 pounds. McLean, a civil engineer and astronomer, later became a Royal Air Force officer and is considered the founder of the Fleet Air Arm.

TRIVIA

1. Which bridge did Frank McLean's Short S.33 touch the water at during his 1912 flight up the Thames?

- Tower Bridge
- London Bridge
- Blackfriars Bridge
- Westminster Bridge

2. Which crossword answer matches this clue: Emergency skill included in cabin-crew training?

- CPR
- EPIC
- DAY
- DEN

3. Which crossword answer matches this clue: Lighter-than-air craft such as a balloon or airship?

- AEROSTAT
- SWAY
- AAL
- STAR
