THIS DAY IN AVIATION

1960

16 August 1960

On 16 August 1960, Captain Joseph William ("Red") Kittinger II stepped from a balloon gondola at 102,800 feet above New Mexico's Tularosa Valley. This daring leap marked his third ascent in Project Excelsior, investigating high-altitude bailouts. Wearing a modified David Clark MC-3A suit and MA-3 helmet, Kittinger breathed a mix of oxygen, nitrogen, and helium. During the ascent, his right glove's pressure seal failed, causing painful swelling, yet he proceeded with the historic jump.

Kittinger free-fell for 4 minutes, 36 seconds in -94 degrees F temperatures, reaching 614 mph while trailing a drogue parachute. His main chute opened at 17,500 feet, and he landed 9 minutes, 9 seconds later. The total descent lasted 13 minutes, 45 seconds. He earned a second Distinguished Flying Cross and the Harmon Trophy. Kittinger later flew 483 combat missions in Vietnam, including with the 555th Fighter Interceptor Squadron, where he was credited with shooting down a MiG 21.

TRIVIA

- Which award did Captain Joseph Kittinger receive for his 1960 Project Excelsior jump?
